The Sparkling

When the city beats heavy against her windows, she finds solace in her secrets. Joyful in her own company, her inner glow becomes a flame with gold, diamonds and pink sapphires. Like a butterfly, she comes back to the world renewed, ever more radiant, ready to share her light.

The Mischievous

With the sharp strains of a jazz melody, she turns the city into a stage for romance. Shades of green and blue minerals and yellow gold flash through the night air, as she dances across bridges and cobblestones with her mission in mind. She touches heartstrings with each strike of her amorous bow.

The Emancipated

Like quicksilver coursing through the Parisian night, she is both tough and tender, and stops at nothing. With a graphic combination of yellow gold, diamonds and precious minerals, she forges her own path. She is the city as question mark, dangling its elusive answers on one finger like a key to her heart.

The Glamour

From dusk until dawn she enchants with the force of black lacquer, diamonds and gold. Striding through nighttime streets, the pulse of the city moving her forward. She tempts the morning light, each bold step illuminating the new day with sophistication and grace.

The Impish

A rose in her cheeks, and a breeze in her hair, for her, to live is to play. Her charm is disarming, her warmth contagious. Finding adventure around every corner, nothing can dampen her spirit. Bright inlaid stones, dynamic movement and flashes of diamonds bring her magic to life.

The Voluptuous

The liquid cool of silk, the warmth of afternoon sun through a window, the refreshing splash of a fountain: one touch brings all her senses alive. When she sways her hips, the whole world follows. Diamonds and pearls are set in generous silhouettes to explode into light.

The Delicate

She comes on like a whisper, a gesture, a dream. She follows the clouds on a rainy afternoon, and loves to be in love. In a flash of inspiration, she will promise her heart. Yellow or white gold are kissed by delicate rows of diamonds.
